It is said that because of certain admissions made in the hearing on the question of publishing export rates, an investigation is to be made by the Interstate Commerce Commission into the relations existing between the Boston Steamship Company and the Northern Pacific Railroad. CHARACTER INDICATED BY THE WAY SHOES WEAR

Scarpology is the name of a novel method of divination which is now attracting some attention in Europe. It was invented by a scientist of Basie, and it is based on the assumption that the character of any person can be told from his shoes.

Here are a few of the principal rules When a heel and sole are worn equal-ly, meaning thereby when neither is in a worse condition than the other, one may be confident, if a man wears the shoes, that he is energetic and is endowed with excellent business ability. and, if a woman, that she is loyal to her husband and a good housekeeper.

The outer edge of a sole if much worn is a sure token of a fanatic, wayward spirit; but, on the other hand, if the inner edge is worn the wearer is timid and irresolute.

When the shoes are much worn along the outer edge and the leather around the toes begins to look shabby, the other parts of the shoes meanwhile being confident that the wearer is a rogue."-
